Summary

Front-end developer with 2 years commercial experience. Skilled in Javascript, Typescript, and React. Highly motivated developer with a strong foundation in web development and design. Passionate about creating impactful digital solutions and continuously growing skills. Thrives in collaborative team environments, and always strives to deliver high-quality, user-centric products. Looking to continue my career in front-end, with a strong interest in React.

Skills

- **Languages:** HTML5, CSS, SCSS, JavaScript, TypeScript, JSX
- **Libraries / Frameworks:** React, Node, Redux, React Router, Tailwind
- **Testing:** Jest, Cypress, Cucumber, React Testing Library
- **Tools:** Visual Studio Code, Git, GitHub, Confluence
- **Design:** Photoshop CS6, Figma
- **Database:** MongoDB
- **Other:** Responsive Design, Accessibility

Experience

Accenture – UI Developer | 12/2023 – Present

- Worked as a UI developer on a large, complex government project, utilizing TypeScript, React, Cypress, and Jest to deliver high-quality solutions.
- Analyzed client deliverables and took ownership of UI epics, ensuring alignment with project goals and client requirements.
- Enhanced Jira ticket quality and collaborated on Mural designs to refine and improve project planning.
- Actively participated in code reviews, promoting best practices and maintaining high code standards.
- Refactored inefficient code, eliminated redundancy, and streamlined the repository to improve maintainability and ease onboarding for new developers.
- Performed major Node.js upgrades, ensuring the security and stability of the application.
- Contributed to comprehensive documentation and conducted in-depth analysis of the codebase to improve team knowledge and project transparency.
- Acted as team lead for a small, complex charity project, overseeing development and coordinating team efforts.

- Collaborated cross-functionally with testers, backend developers, and product owners to ensure seamless project delivery.
- Led 'show and tell' sessions, presenting progress and solutions to clients both in-person and via Teams, fostering clear communication and stakeholder engagement.

Code Academy Front end developer course | 2021 - 2022

- Expanded knowledge of JavaScript, React, Redux, and testing libraries such as Jest and Mocha.
- Built personal projects and gained confidence in developing modern web applications.

Web designer : Self-Employed | 2018 - 2022

- Designed and developed websites for local businesses, focusing on user-centric, high-conversion designs.
- Delivered solutions combining graphic design and web development.

Business Owner | 2012 - 2022

- Launched and managed a business specializing in artist materials.
- Developed key business management skills while adapting to challenges like the COVID-19 pandemic.
- Built a strong foundation in problem-solving and managing complex projects.

Education
